Love Fantasy is a free dating sim game developed by Koking Games. Our second English language Fantasy themed game (after Shortbus!). So how is this one different? Well, it's a dating sim! Still free! So you can get any girl you want, on any level!There are two ways to play the game: the arcade and the story mode. In the arcade mode (the only game mode in the game as of now), you have only one girl to date. You'll have to complete the game mode to unlock another character. This will also unlock a different ending. There is only one main story mode in the game, where you will be with all the girls you've met in the game. You can have your own relationships with them, and eventually, you will have the option of marrying them. A large number of original songs have been crafted for the game, and soundtracks are available for the record! And now for the game: Introduction Welcome to Love Fantasy: A Small Planet. We have two main (yet equally beautiful) girls to date: Anelisa and Anjalisa. Each girl has a unique personality that will be an asset to your relationships with them. Halloween Party: A House of Cards How long will you date your girl? You've fallen in love with Anjalisa and you'll be forced to date her in order to win her heart. Yet with Anelisa, you must win her heart. What kind of guy is the perfect match for Anjalisa? Anjalisa is a caring girl who wants a guy to love and respect her. The typical shy, slightly sweet girl. What kind of guy is the perfect match for Anelisa? Anelisa is a silly girl. She likes to laugh at herself and she is very carefree. She enjoys her life while taking everything in. How to Make Her Love You: To win her heart, you must show your love for her with small acts of kindness and patience. For example, if you help her with homework, make sure to listen carefully when she talks to you. When she is sad, comfort her and let her watch a movie with you. You will know how to love her with these small acts. Chat Type of Day Getting to know her with a daily conversation. Chat Type of Day

Hey everyone! I was looking around the website and I saw this, it was made by a player from a game called Need to know? which I played when I was younger. He said he would work on it and never really did. Now I want to update it and make it look better. I made a design of the new page to add some background so it would look more like the original. I added some but I think it's too big. Hey everyone! I was looking around the website and I saw this, it was made by a player from a game called Need to know? which I played when I was younger. He said he would work on it and never really did. Now I want to update it and make it look better. I made a design of the new page to add some background so it would look more like the original. I added some but I think it's too big. He has it in hand and it's close to being finished, but he also doesn't have much time. I find it rather cool to use this RPG to discover more about this character. I will be the main antagonist. I was behind on the schedule and had to explain it to the company. But the new version is coming soon. If you want to see this in action, check the videos of Ntl in action. I have made the streams for this RPG on youtube. Also, I am checking out Discord if I can find it. I am having trouble finding a screen cap of this RPG for my ArtTalk video. I think there is a whiteboard for this or something that would be awesome. It would be fine to just upload a picture, just need a screenshot of it. Just be sure to give credit to the original creator and put a link to his thread when you use it. ]]> Themes is a narrative game about themes, stories, and what happens when you push the boundaries of fantasy!Apollyon: TableTop is a narrative science-fiction RPG, similar to a Choose Your Own Adventure game but with more polish and better graphics. It is a roguelite, it has a turn-based combat system, in which one player will control a character and the other will be a guide who presents dialog and information to the player. It has themes and archetypes, a turn-based combat system, character advancement, monsters, a world map, locations, and even an auto-save system

**Strange Supernaturals** is a weekly Fargios review and token review, every Friday. You can find it on [www.fantasygrounds.com](http://www.fantasygrounds.com). This week's review is focused on **Strange Supernaturals**. **Strange Supernaturals**, despite being a somewhat loose collection of stories, is a massive contribution to the superhero movie industry, with a lot of well-known characters being covered. **Strange Supernaturals Volume 10 (Token Pack) Interior art** courtesy of **Daniel Hindman** ([www.danielhindman.com](http://www.danielhindman.com)) All of these tokens seem to have the same amount of art, being colored in a simple, uniform style. But I am curious to what extent this is true and whether or not it's a sample of comic book coloring, as opposed to digital coloring. This is the fourth volume of **Strange Supernaturals** that I've encountered, along with **Strange Supernaturals Volumes 1, 2 and 3**. There are seven stories in **Volume 9**; **Volume 7** gave us eight stories, **Volume 3** gave us six stories, so **Volume 4** gives us seven stories -- and the last story would be too brutal to be added to this review as it involves stuff that I don't think even all the frickin' New Yorkers have seen. **Volumes 3 and 4 are not the books' most popular** and they tend to drop in on the lower end of the sales charts, but they are still always in the **Top 10** among the **30 most popular products** according to [salespowr.com](http://salespowr.com). Having said that, this is a lesser-known product, which is why I feel as though I should be kind to it, so let's dig in. **Strange Supernaturals Volume 10 (Token Pack) Interior art** courtesy of **Daniel Hindman** ([www.danielhindman.com](http://www.danielhindman.com)) **Strange Supernaturals Volume 10 (Token Pack) Interior art** courtesy of **Daniel Hindman** ([www.danielhindman.com](http://www.danielhindman.com)) **Strange Supernaturals Volume 10 (Token Pack) Interior art** courtesy of **Daniel Hindman** ([www.danielhindman.com](http://www.danielhindman.com)) We start out with the excellent "The Black Eyed Blond" by Charles Soule, about a character who's angry at her boss for seemingly ruining her life, and ends up doing the same to him. The main villain's plan involves painting money black and

Ever since he was a little boy, Rook was fascinated by stories of space. While most kids his age were scouring the ground for dinosaur bones, Rook's eyes were on the sky. He was so obsessed with space that his mother—always concerned that his far-out ideas might actually come to fruition—encouraged him to build a telescope. As it turns out, stories of space are very real. Rook's telescope spins him into an intergalactic adventure. Over the course of an hour or so, I play **Cities: Skylines**, which is sort of like **Sim City**, where you have the ability to create or destroy buildings. But instead of the map being a series of tiny parcels on a flat plane, the map looks like it is cast on a spherical shell, that grows as you add or create more buildings. You also are faced with the challenge of managing the supply and demand of the city—not to mention the habitability of it. There's a lot to keep track of, so it's easy to get overwhelmed. But it's still fun. After all, Rook always did want to be an astronaut. **Point of View:** As the Mayor, you are responsible for everything that happens in your city. You'll need to decide what to create, where to place things, and which things are legal or illegal. There are laws to follow, as well as a budget to worry about. Sometimes, you'll need to make short term deals to satisfy the demands of the other towns while long-term plans to build a bridge for all your citizens to cross a fast-growing lake to an expanding city will take years. It's a busy job that requires lots of decisions. I'm currently using the Oculus Rift headset, and it's awesome. It's a lot like playing **Sim City** on a 3-D screen. Nowhere as good as the actual game, but close. It's very natural to turn 360 degrees in any direction, and seeing the world moving when you move around the map is pretty cool. **Advertisement:** If you ever played **Myst**, it's a similar feeling. My first impression of the graphics on **Skylines** is that the game really looks like it is in space. It's very **Star Wars**. Or **Star Trek**. You won't really notice it at
