i've been on the hunt for a stylus/pen that was previously reviewed here. after putting it through a couple of trials, i've now come to the conclusion that this one is a little bit heavier than the original model and that the end result is worth it. the pen has a very soft nib and a matte finish. my first impressions have changed a little bit since the review: it has a very nice feel to it. it's almost like writing with a piece of glass. this was the pen i was missing from my collection. i didn't expect a pen of this quality from spectrasonics. i have been a fan of the original model for years and this one is everything i wanted it to be and more. the nib is extremely smooth and the pen is really balanced. i have no complaints about this pen. i use my pen for everything from notes to sketching and everything in-between. it has a very nice feel. i don't think i've had a pen that has felt as good to use. it has this springy feeling when you write with

it and it's not too firm. i'm really happy to have a stylus of this caliber in my collection. arguably the most innovative piece of audio hardware ever made.

spectrasonics' stylus rmx sage expander is the perfect companion for the roland spd-sx or spd-sd and expands the functionality of both instruments without any need for additional hardware. utilising the innovative dynamic stylus expansion system, any note played with any instrument or pedal will be recorded and played back through the audio path. this allows you to use a variety of drum sounds and tones with your roland spd-sx or spd-sd and expand your tonal palette. it's the simplest way to "put your whole band on the beat". with the roland spd-sx or spd-sd's built-in microphone, you can even record your own drum solos.

spectrasonics' stylus rmx sage expander is an essential piece of audio gear for any serious player or studio. spectrasonics' stylus rmx

sage expander is available for the
roland spd-sx and spd-sd.

These new features are all exclusively for Stylus RMX, and included as part of the new core library upgrade. This means that the new sounds in Stylus RMX offer a much wider range of modern musical genres than the original Stylus. And unlike the other grooves and drum kits in Stylus RMX, they come with a huge range of constantly evolving, and nearly infinite variations of tempos and beats. Spectrasonics has really tried to push this envelope with Stylus RMX, and we couldn't be happier with the result! For musicians who want a truly unique production experience, Stylus RMX is more than worth checking out. So, what is Stylus RMX Xpanded then? Well, it's essentially Stylus RMX with Xpanded added. Xpanded is a sound design product by Spectrasonics that expands Stylus

RMX by providing additional S&H Session, Space Designer and Page Designer libraries that are completely compatible with Stylus RMX, and are the very best sounding loops, and additional sounds and soundsets in their categories. In fact, Stylus RMX Xpanded contains more sounds than Stylus RMX by itself. As a result, there are even more ways to manipulate and mix sounds and grooves in Stylus RMX Xpanded. Not only do you get access to the new Stylus RMX Xpanded 7.4GB sound library, Stylus RMX Xpanded provides access to: Subsonic and Electric House sounds The Space Designer library was recorded at Spectrasonics using specially designed mics that can produce extremely clean and detailed sounds that are ideal for low-fi environments, and tracks like this often sound fantastic on headphones. The Space Designer is also ideal for making large, highly natural sounding pads, or techno-

inspired club sounds. With just a few tweaks, the Space Designer is able to produce a huge variety of pads, pitched, swung or bowed sounds. Other amazing samples in the Space Designer include Bowed Glides, Suspended Bells, Hip Hop Swings and Bowed Bells.
