One module is placed on the bottom of the screen and displays a clock to the left. The other module is placed on the bottom of the screen and displays a second clock to the right. A lot of time will be saved because you have to do a lot less work and mouse movements to check both time displays than with a single clock widget. The U Bottom Desk Clock widgets are also a very attractive, ergonomically favorable design. The clocks are displayed in an overlapping fashion, so there is no blank space between the clocks. The clocks can be rotated, moved and zoomed. The U Bottom Desk Clock widgets are only available for the Linux xfce and the xfce4 DEs. They do not work with the xfdesktop (for KDE and Gnome). -- SOME INFORMATION ABOUT X WIDGETS -- X Widgets are a set of open-source applications that provide a wide range of functionalities to the Linux desktop, such as clocks, buttons, menus, launchers, sliders and a lot more. Each widget comes with a set of parameters and widgets that you can customize through the advanced

configuration tool that comes with the widget. The X Widget Manager (xwm) is a unique feature that allows you to
